"What's New in Fluid Resuscitation for Hemorrhagic Shock...is Old"

Alan I. Frankfurt, M.D.

Anesthesiologist
Dallas, Texas

Objectives:

- Review the five hemorrhage resuscitation goals.
- Identify the physiologic shortfalls of resuscitating bleeding patients with the Massive Transfusion Protocol (MTP).
- Recognize that (cold) whole blood meets the physiologic challenges of volume administration, oxygen delivery and maintenance of hemostatic potential more efficiently and effectively than the MTP.
- Review the physiologic limitations of the MTP when addressing hemorrhagic shock and oxygen debt repayment, good patient care demands whole blood criteria and protocols be put in place for selected "massively" bleeding obstetric patients.

Target Audience: This activity is designed for OB/GYN physicians. We also invite physician assistants, nurse practitioners, nurses, and allied health professionals.

Program Director: Eugene Hunt, M.D. – *chair*, Department of OB/GYN, Texas Health Presbyterian Hospital Dallas – Dallas, Texas

Format: Didactic lecture with a question-and-answer session

Accreditation:

In support of improving patient care, Texas Health Resources is jointly accredited by the Accreditation Council for Continuing Medical Education (ACCME), the Accreditation Council for Pharmacy Education (ACPE), and the American Nurses Credentialing Center (ANCC), to provide continuing education for the healthcare team.

Designation of Credit:

Physicians: The Texas Health Resources designates this live activity for a maximum of 1 *AMA PRA Category 1 Credit*[™]. Physicians should claim only the credit commensurate with the extent of their participation in the activity.

Nurses: 1 contact hour will be provided for nursing.

Doctors on the medical staffs practice independently and are not employees or agents of Texas Health hospitals or Texas Health Resources. © 2023 Texas Health Resources.

JOINTLY ACCREDITED PROVIDER[™]
INTERPROFESSIONAL CONTINUING EDUCATION
