Heather Fisher, MS, CGC

Genetic Counselor | Obstetrics/Gynecology and Maternal-Fetal Medicine
UT Southwestern Medical Center – Dallas, Texas

"Cell Free Fetal DNA Screening in 2024 – Many Options, How to Choose?"

Objectives:

- Summarize overall benefits and limitations of cell free fetal DNA screening for use during pregnancy.
- Differentiate between the two main technologies used for cell free fetal DNA screening for aneuploidy (quantitative and SNP-based) and understand strengths and limitations of each.
- Identify three different testing options for cell free fetal DNA screening for specific genes, and describe indications for use of each one.

Target Audience: This activity is designed for OB/GYN physicians. We also invite physician assistants, nurse practitioners, nurses, and allied health professionals.

Format: Didactic lecture with a question-and-answer session

Accreditation:

In support of improving patient care, Texas Health Resources is jointly accredited by the Accreditation Council for Continuing Medical Education (ACCME), the Accreditation Council for Pharmacy Education (ACPE), and the American Nurses Credentialing Center (ANCC), to provide continuing education for the healthcare team.

JOINTLY ACCREDITED PROVIDER™
INTERPROFESSIONAL CONTINUING EDUCATION

Designation of Credit:

Physicians: The Texas Health Resources designates this live activity for a maximum of 1 *AMA PRA Category 1 Credit*™. Physicians should claim only the credit commensurate with the extent of their participation in the activity.

Nurses: 1 contact hour will be provided for nursing.
