Objectives: Upon completion of this activity, the participants should be able to:

- Outline the rehabilitation therapist's clinical workflow, from receiving physician orders to initiating a comprehensive evaluation
- Differentiate the roles and intervention strategies of physical therapy, speech-language pathology, and occupational therapy in managing non-orthopedic, non-surgical trauma cases
- Describe the key components and considerations involved in conducting a bedside rehabilitation evaluation
- Identify primary therapeutic goals for rehabilitation therapists during the acute phase of trauma recovery
- Explain the importance of an interdisciplinary team approach in discharge planning to optimize functional outcomes and continuity of care

Target Audience: This interdisciplinary activity is designed for physicians and nurses caring for trauma patients. We also invite physical therapists, occupational therapists, speech language pathologists and other allied health professionals to attend.

Format: Didactic presentation with Q&A session
