Associate Professor of Pediatrics | Division of Neonatal-Perinatal Medicine
UT Southwestern Medical Center | Children's Health Dallas – Dallas Texas

"Redefining Feeding Intolerance in Preterm Infants Through Objective Measurement"

- Recognize why "feeding intolerance" is a subjective diagnosis.
- Interpret common bedside signs (gastric residual volume, distension, emesis, stool patterns, cardiorespiratory events) with appropriate skepticism as it relates to feeding intolerance.
- Describe the negative effects of delaying, withholding, interrupting, or limiting enteral feedings to infants who will never develop pathologic feeding intolerance.
- Recognize that an interprofessional team approach to care is required for the development of specific, reliable, and objective biomarkers of feeding intolerance.

Target Audience: This interprofessional activity is designed for physicians and nurses. We also invite all others who care for neonates to attend.

Format: Didactic lecture with question-and-answer session

Accreditation:

In support of improving patient care, Texas Health Resources is jointly accredited by the Accreditation Council for Continuing Medical Education (ACCME), the Accreditation Council for Pharmacy Education (ACPE), and the American Nurses Credentialing Center (ANCC), to provide continuing education for the healthcare team.

Designation of Credit:

Physicians: The Texas Health Resources designates this live activity for a maximum of 1 *AMA PRA Category 1 Credit*TM. Physicians should claim only the credit commensurate with the extent of their participation in the activity.

Nurses: Texas Health Resources designates this activity for 1 contact hour.
