Ronen Schneider, M.D.

Nephrologist, Renal Genetics | Brigham and Women's Hospital
Boston Massachusetts

“Advancing the Standard of Nephrology Care with Renal Genetic Testing”

Objectives:

- Apply evidence-based criteria to identify patients with kidney disease who may benefit from genetic testing.
- Differentiate between pathogenic/likely pathogenic variants and variants of uncertain significance, and integrate these results into diagnostic refinement, risk stratification, therapeutic decision-making, and transplant planning.

Target Audience: This activity is designed for internal medicine physicians and residents. We also invite physician assistants, nurse practitioners, nurses, and allied health professionals to attend.

Format: Didactic lecture with question-and-answer session.
